

2014 Prohibited List Changes

Summary of Changes

All sporting organisations, athletes and athlete support personnel are encouraged to make themselves familiar with changes to the 2014 Prohibited List. Please note that these changes will come into effect from 01 January 2014.

In- and Out-of-Competition

- **International Non-proprietary Names (INN):** the names of some substances on the List have been updated to International Non-proprietary Names (INN). For ease, however, previous names have been maintained and no substance has been deleted.
- **Peptide Hormones, Growth Factors and Related Substances:** as made clear through points S2.2, S2.3 and S2.4 of the List, releasing factors are prohibited. Furthermore, other prohibited growth factors are listed separately.
- **Vaptans:** Vasopressin V2 antagonists (**vaptans**) have been added as an example of a diuretic subclass to section S5.

In-Competition

- **Stimulants:** MDMA and MDA have been reclassified from S6a to S6b because they are now recognized as less likely to be used as doping agents; **cathinone** and its analogues (e.g. mephedrone, methedrone, α -pyrrolidinovalerophenone) and **trimetazidine** have been added as examples to reflect emerging patterns of drug use.

Sport Specific

- **Sports changes:** "Aeronautic" has been replaced by "Air Sports", and "FITA" has been replaced by its new acronym "WA" (World Archery).

Wording Changes

- To ensure clarification and accuracy, changes were made to the definitions of "exogenous" and "endogenous" in section S1 of the List.
- For the purpose of scientific accuracy, the term **allogenic** was introduced to section M1 of the List.
- In the interest of accuracy, changes were made to the wording describing the blood alcohol threshold in section P1 of the List.

Monitoring Program

- **Monitoring Program:** in order to detect potential patterns of abuse, **mitragynine** has been added to the Narcotics class of the Monitoring Program.

Other more technical changes are detailed throughout the List. The 2014 Prohibited List and a summary of modifications can be found on the UK Anti-Doping website [here](#).

Should you have any questions about the changes please contact **Science Officer Sarah Foxton** at sarah.foxton@ukad.org.uk or on 020 7842 3463.
